

ABDUL KARIM

B.Tech CSE (AI/ML) | Aspiring AI/ML Engineer

+91 9534957390 | ✉ abdukarim9991k@gmail.com | LinkedIn: [Abdul Karim](#) | GitHub: [K208-k](#) | 📍 Roorkee, UK IN

PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning at Quantum University, with hands-on experience in Python, machine learning, and deep learning. Experienced in data preprocessing, predictive modeling, NLP, model evaluation, and building practical ML solutions using Scikit-learn, TensorFlow, and PyTorch. Seeking an entry-level AI/ML or Data Science role to apply machine learning skills to real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL

Machine Learning: Regression, Classification, Clustering, Scikit-learn, XGBoost

Deep Learning: Artificial Neural Networks (ANNs), Convolutional Neural Networks (CNNs), TensorFlow, PyTorch

Data Science: Pandas, NumPy, Matplotlib, Seaborn

Databases: MySQL, PostgreSQL

Developer Tools: Git/GitHub, VS Code, Jupyter, Docker

Other Technologies: REST APIs, Linux

EDUCATION

B.Tech. in Computer Science Engineering — AI/ML Specialization

Quantum University, Roorkee | 2023–2027

CGPA: 7.68

Class 12 — CBSE / 2023 / 65%

Class 10 — CBSE / 2021 / 75%

PROJECTS

House Price Prediction System | Python, Scikit-learn, XGBoost, Pandas

- Developed a regression-based house price prediction model using structured housing data, applying feature engineering and outlier handling to improve data quality.
- Implemented and compared Linear Regression, Random Forest, and XGBoost models using cross-validation to identify the best-performing approach.
- Evaluated model performance using RMSE and R^2 metrics.
- Deployed the trained model as a REST API using Flask for real-time predictions.

Sentiment Analysis on Product Reviews | Python, NLTK, Scikit-learn

- Developed a text classification pipeline to classify product reviews into positive, negative, and neutral sentiment categories.
- Applied NLP preprocessing techniques including tokenization, stopwords removal, and TF-IDF vectorization.
- Trained and compared Logistic Regression and Naive Bayes classifiers using accuracy and F1-score.
- Visualized sentiment trends and model insights using Matplotlib and Seaborn.

EXPERIENCE / INTERNSHIP

Machine Learning Intern - Samatrix Consulting

Remote | Jun 2025 – Aug 2025

Project: IPL Player Performance Prediction | Python, Pandas, Scikit-learn, XGBoost

- Developed a machine learning model to predict IPL player performance using historical player and match data.

- *Collected and cleaned an IPL ball-by-ball dataset containing approximately 10 seasons and 150,000+ deliveries, and performed feature engineering using batting form, strike rate, venue statistics, and opponent performance.*
- *Trained and compared Random Forest and XGBoost models, using cross-validation for model evaluation and selection.*
- *Evaluated model performance using appropriate regression or classification metrics and analyzed player trends using Matplotlib and Seaborn.*

CERTIFICATIONS

- *Cyber Awareness & AI Essentials — Quantum University (2026)*
- *AI Applications in Manufacturing — Quantum University (2025)*
- *IOT Workshop — Quantum University (2025)*
- *Android Compose Camp (Intro Session & Day 2) — Quantum University (2024)*
- *Computer Hardware Maintenance Workshop — Quantum University (2023)*

ACHIEVEMENTS

- *Participated in IPR Day Celebration — Quantum University (2026)*
